George Ndung'u

Software Engineer

As a software engineer, I thrive on solving complex challenges and delivering high-quality, scalable solutions. I've led projects that optimized system performance, automated workflows, and improved user experiences, driving significant impact for businesses. My passion for innovation and learning fuels my motivation to continuously enhance my skills, which include full-stack development, system architecture. From collaborating with teams to managing projects, my focus is always on creating efficient, reliable, and cutting-edge software.

Employment History

Software Engineer at Margaret Nduta, Kiambu

MARCH 2023

In the company, teams of engineers collaborate to design, develop, test, and maintain software products. They use various programming languages, frameworks, and tools to build applications that meet client or market needs. The work involves analyzing user requirements, writing efficient code, debugging, optimizing systems, and ensuring software scalability.

Education

Computer Science at The Co-operative University of Kenya, Nairobi

SEPTEMBER 2021 – PRESENT

In the University i have been able to gain knowledge in programming, algorithms, data structures, and system design while working on hands-on projects, coding challenges, and research. The university fosters collaboration, creativity, and problem-solving through labs, workshops, and internships, preparing students for careers in software development, AI, cybersecurity, and more. Professors and mentors guide students as they explore emerging technologies and trends in the tech industry.

Data Structures and Algorithms at Great Learning, Nairobi

JULY 2024 – AUGUST 2024

Graduation marks the culmination of hard work, dedication, and growth. As you step into the next chapter, carry the knowledge and experiences you've gained with confidence and determination. This is just the beginning of an exciting journey filled with opportunities and challenges, and you're more than ready to face them.
